PRESS RELEASE FOR IMMEDIATE PUBLICATION

The next milestone for Abeking & Rasmussen

On Tuesday (26th November 2024) the keel laying of the actual yacht project of Abeking & Rasmussen took place during a ceremony at G & K SteelCon premises; Stettin. This important milestone for the 79,95 m motor yacht was witnessed by representatives of the client, the shipyard, classification society and the subcontractors.

After recent delivery of the largest yacht ever built at Abeking & Rasmussen, this project follows the long history of well proven 80m projects considering up to date technology and equipment.

With the distinctive design of a well known UK based design office the yacht will feature tenders, water toys and a modern, but cozy interior design. We, together with all parties, are proud to have the opportunity to build this fantastic yacht.
